

Camille LAIGNEL – Master's Student in Statistics for Public Policy

Camille.laignel.07@gmail.com | 07 69 40 43 30 | [Linkedin](#) | Rennes (France)

Looking for an internship in a public administration

Master's student in Applied Statistics and Data Science, passionate about using quantitative methods to support evidence-based policymaking. Seeking a six-month internship in a public administration or European institution from February 2027.

Education

Master's Degree in Applied Mathematics and Statistics (MAS) - Data Science for Public Decision making - ENSAI & University of Rennes - 2025-

Advanced training in applied statistics, data analysis and statistical modelling, with a focus on using quantitative methods and data-driven approaches to support public decision-making.

Magistère in Statistics and Economic Modelling - University of Rennes - 2024-

Selective dual-degree program in statistics, econometrics and data science (modelling, machine learning, advanced methods, databases).

Bachelor's Degree in Mathematics and Computer Science for Social Sciences (MIASHS) - University of Rennes - 2022-2025

Bachelor's degree focused on mathematics, data analysis, and statistics, with training in computer science (R, Python, SQL) and a specialization in statistical data science and econometrics.

Academic Projects

Research Project – Student stress study 2024-2025

Investigation of stress factors among 149 MIASHS/MAS students using survey data, with interactive results visualized through an R Shiny dashboard.

Econometric Study - « Employability of master's students » 2024-2025

Statistical analysis using R and excel of master graduates' employment using a french ministry dataset, including missing data imputation and synthesis of results to highlight socio-economic and regional disparities.

Professional Experience

Research Intern – « QPQR » (Who leaves, who stays ?) project (LIRIS, University of Rennes 2) 2026

Applied statistical and econometric methods to large-scale quantitative survey data, including data cleaning, indicator construction, modelling, and result interpretation within an interdisciplinary social science research project.

Data Analysis Intern - Traffic and road Uses Observatory (DIRO, French Ministry of Transport) 2025

Analysed large-scale traffic datasets using R, developed dashboards (R Markdown), and automated statistical reporting to support mobility planning and infrastructure management.

Skills

Programming & Tools: R, R Shiny, Python, SQL, SAS, Excel, Power BI

Analysis & Modelling: descriptive statistics, regression, clustering, Statistical & Econometric Modelling

Data Science: data cleaning and preprocessing, missing data imputation, interactive dashboards

Languages

English (C1 – TOEIC 990), Spanish (Advanced),
Chinese (Intermediate), French (Native)

Volunteering

President, MAS Students' Association,
volunteer for « Les Glanneurs Rennais » (2023-24)
